

Farm to Home Initiative by Growceries

India is home to 3000+ small/micro rice mills, 4000+ small/micro flour mills, more than 70 million small dairy farms and 3500+ egg and poultry farms. These small enterprises often succumb to low business opportunities and sell their products to large manufacturers who further process, label and brand it. Most products like oils and eggs used in cosmetic brands are bought out at such farms with a basic profit margin. Helping the small enterprises, you can now order quality assured fresh products straight from the farm. Schedule your order on our app and Growceries will deliver it home. You can subscribe for regular deliveries on rice, pulses, milk and other dairy products with an option to discontinue deliveries from a mill/farm if quality of the products is reduced. This ensures you get fresh, quality products at the lowest cost possible whilst providing a chance at growth to the small businesses in India.
